

ABSTRACT

~~The present invention provides a~~ A verification method of a sample solution amount
[[comprising]] includes the steps of: detecting at least one of ~~selected from the group consisting~~
~~of~~ a transmitted light component, a scattered light component and a reflected light component of
a light by a photosensor while irradiating a sample solution, which is being injected into a
sample cell, with the light; and verifying that a predetermined amount of the sample solution is
held in the sample cell based on a change in an output signal from the photosensor.
